Objective

B.Tech ECE student (**CGPA: 9.56**) with strong experience in **full-stack development, Python backend systems, and AI-driven applications**. Skilled in building **REST APIs, automation workflows, and scalable data pipelines** using **Python, FastAPI, and modern JavaScript frameworks**. Experienced with **cloud platforms (AWS/GCP), databases, and LLM-powered systems**. Seeking an opportunity as a **Software Development Engineer Intern (Full Stack)** to build scalable fintech systems and data-driven platforms.

Education

Bachelor of Technology in Electronics and Communication Engineering

SRM Institute of Science and Technology, Chennai

CGPA: 9.56

Aug 2023 – Present

Relevant Coursework

- Artificial Intelligence
- Machine Learning
- Scientific Python
- Computer Organization and Architecture

Experience

Software Engineering Intern

Centre for Development of Telematics (C-DOT)- Delhi

Jun 2026 – Present

On-site

- Working on secure communication and cryptographic networking systems.
- Assisting in deployment, configuration, and testing of Q-SETU IP Encryptors in Linux environments.
- Performing system validation, troubleshooting, and security testing of networking devices.

Next.js Intern

GenoSpark

Dec 2025 – Mar 2026

Hybrid

- Developed a **user analytics dashboard** enabling data-driven insights on user behaviour.
- Translated business requirements into scalable full-stack solutions using **Next.js, REST APIs**, and modular backend architecture.
- Analysed interaction data to identify behavioural patterns and product improvement opportunities.
- Delivered features independently in a fast-paced development environment using Git workflows.
- Followed professional coding standards, testing practices, and documentation guidelines.

Software Engineering Intern (Research)

IIT Allahabad

Nov 2024 – Dec 2024

On-site

- Designed a **Scene Text Spotting system** integrating detection and recognition modules into a unified pipeline.
- Collaborated with research teams to convert problem statements into deployable AI systems.
- Optimized model performance achieving **85%+ accuracy** with **30% faster inference**.
- Documented architecture and experimental results for academic evaluation.

Software Engineering Intern (AI/ML)

IBM AICTE

Nov 2024 – Jan 2025

Remote

- Built ML pipelines using **Python and SQL** for data preprocessing, model training, and evaluation.
- Automated workflows using **GitHub Actions** and CI/CD pipelines.
- Improved pipeline performance by **30%** through optimized data processing strategies.
- Applied analytical techniques to align ML insights with business use cases.

Software Engineering Intern (ML)

AWS EduSkills

Sep 2023 – Nov 2023

Remote

- Deployed ML models on **AWS EC2** with storage using **AWS S3**.
- Explored scalability, reliability, and monitoring using **CloudWatch**.
- Strengthened knowledge of cloud infrastructure for ML systems.

Projects

YouTube Intelligence Pipeline 

Personal Project

2026
On-site

- Built an end-to-end **Agentic AI pipeline** using **Google ADK** and **Gemini 2.0 Flash**.
- Designed a real-time ingestion system using **YouTube API v3** and **PubSubHubbub webhooks**, storing data in **MongoDB Atlas**.
- Exposed five LLM-callable tools, enabling the AI agent to autonomously select the appropriate tool for user queries.
- Developed a **Streamlit** chatbot interface with real-time analytics and visualizations powered by a **FastAPI** backend.
- Containerized the application using **Docker** and implemented CI/CD pipelines with **Google Cloud Build**.

User Analytics Dashboard 

GenoSpark

2026
Hybrid

- Built a data analytics platform to track and analyse user engagement patterns.
- Implemented modular architecture supporting scalable dashboard analytics.
- Provided insights for data-driven product decisions.

Human and Animal Intruder Border Detection System 

SRM Inhouse

2025
On-site

- Developed a real-time border surveillance system using **Computer Vision** and **Deep Learning** for intrusion detection.
- Implemented object detection models to identify and classify **humans and animals** from live video streams.
- Designed an automated alert mechanism to notify security personnel upon detecting unauthorized intrusions.
- Optimized the detection pipeline for real-time performance and reliable monitoring in border security scenarios.

Scene Text Spotting System 

IIIT Allahabad

2024
On-site

- Developed a modular pipeline integrating text detection and recognition.
- Demonstrated production readiness with testing and documentation.

Employment Burnout Analysis 

IBM AICTE

2025
Remote

- Designed a complete ML workflow from data ingestion to predictive modelling.
- Generated insights using **Python** and **SQL** supporting decision-making.

Technical Skills

- Programming Languages:** Python, JavaScript, TypeScript, C++, SQL, C
- Backend Development:** FastAPI, REST APIs, MVC Architecture, API Integration
- Frontend Development:** React, Next.js, HTML5, CSS3, Tailwind CSS
- AI / ML Tools:** TensorFlow, OpenCV, Streamlit, LLM Systems, Google ADK
- Data Analytics & Visualization:** Power BI, Microsoft Excel, Pandas, NumPy, Data Cleaning, Data Visualization, Dashboard Development
- Databases:** PostgreSQL, MongoDB Atlas, MySQL, MS SQL Server, Prisma ORM
- Cloud Platforms:** AWS (EC2, S3, CloudWatch), Google Cloud Platform
- DevOps & Tools:** Git, GitHub Actions, Docker, CI/CD, Postman, Figma
- Core Strengths:** Data Structures, Problem Solving, Analytical Thinking, System Design

Certifications & Extracurriculars

- Certifications:** AWS Cloud Practitioner,AWS Certified AI Practitioner, AWS Machine Learning Foundations,ServiceNow CSA, Oracle Fusion Cloud
- Extracurriculars:** Google Cloud Arcade (2× Participant), Hackathon Finalist (CODRELATE 2025), Winner – Citi Global Blockchain Hackathon 2025
- Interests:** FinTech Platforms, Technology Consulting, Cloud Systems, AI-driven Automation
